ALARM SYSTEM

Your secure home

www.satel.eu

Security. Peace. Family. PERFECTA!

Discover the alarm system that adapts to you! Designed to meet individual needs of the owners of small and medium-sized buildings, including homes, apartments, small businesses, summer houses, etc. Intuitive operation and remote control by using keyfob, SMS or mobile application – these are just some of the features of the PERFECTA system. Learn more!

Modernity

The alarm system and mobile technology have one thing in common, which is the modern PERFECTA CONTROL application. It converts your smartphone into a miniature management center of alarm system that you can always have with you, no matter where you are.

And

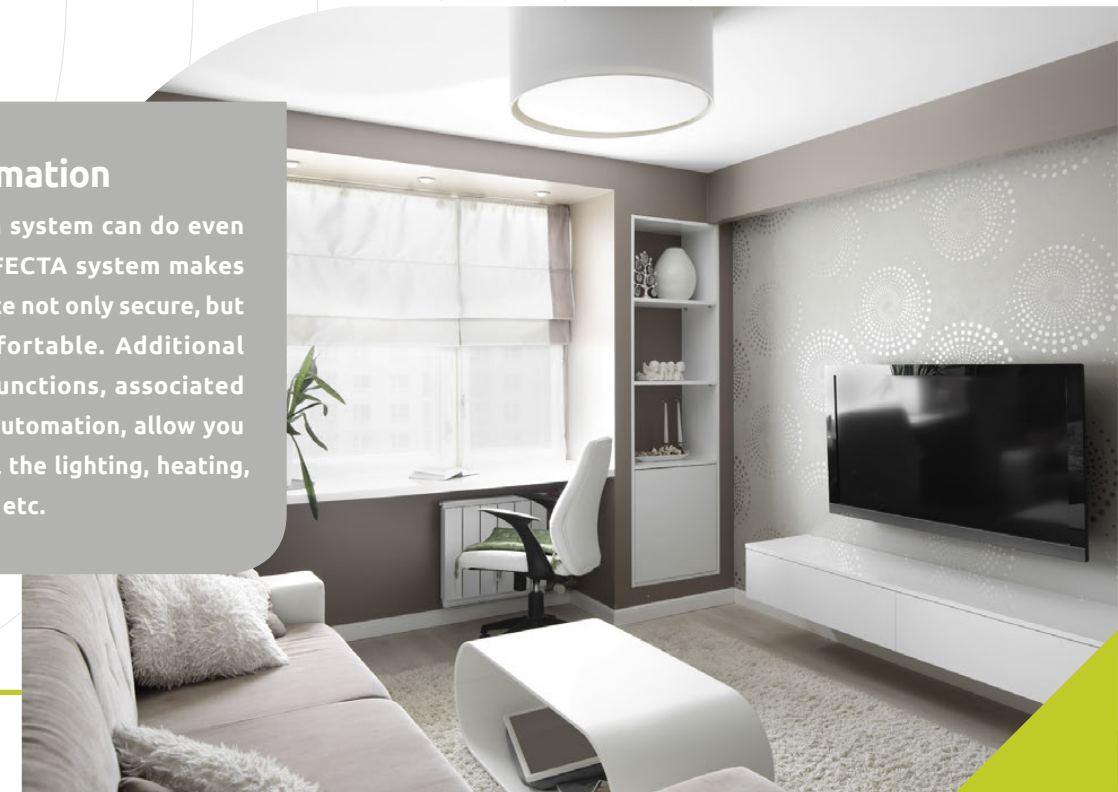

Simplicity

You prefer traditional methods of operating the alarm system? Working with the keypad is pleasant and at the same time so simple that any family member can handle it – regardless of their age! The large, convenient buttons make the daily operation of the system easier. In addition, the transparent display clearly shows the entered commands, which further minimizes the risk of mistakes.

Home automation

Now your alarm system can do even more! The PERFECTA system makes your home a place not only secure, but also more comfortable. Additional control panel functions, associated with the home automation, allow you to easily control the lighting, heating, air conditioning, etc.

Convenience all along

The PERFECTA system can be easily tailored to your needs.

Customizability of the available functions opens up many possibilities for you.

- Building or planning to renovate a house? Choose the **traditional wired system**.
- Want to limit the quantity of cables or maybe you've decided to install the system after renovation? The **wireless system** will work best for you.
- You can also create a **hybrid system**, which combines the advantages of both solutions.

The choice is yours!

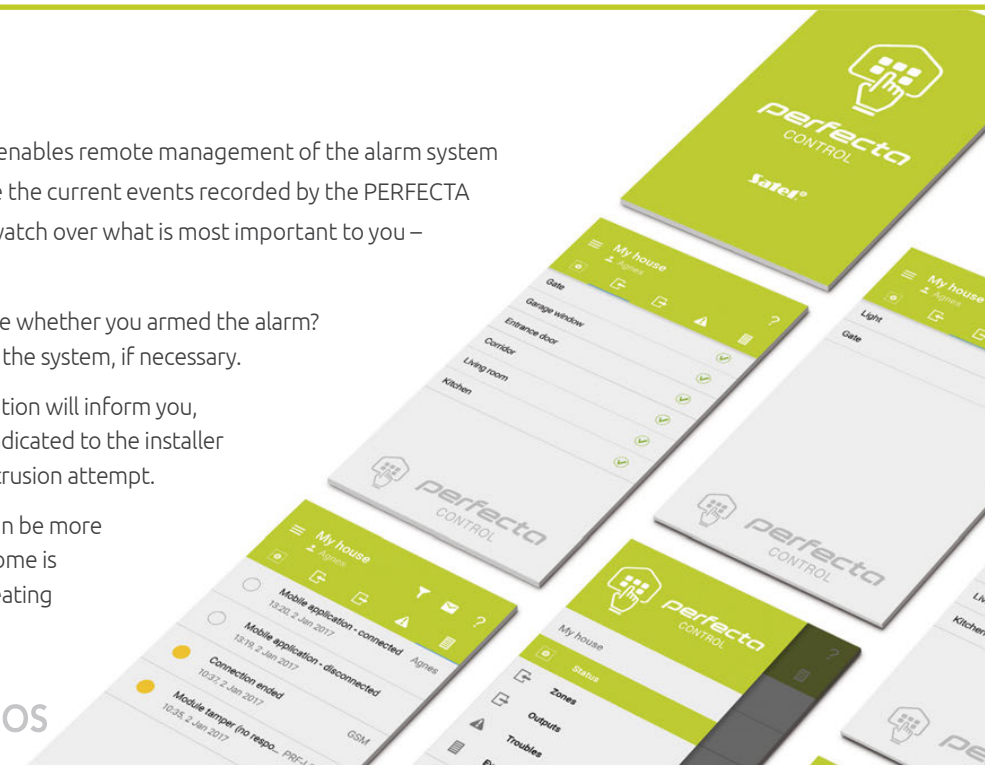

Instant installation

Installation and configuration of the PERFECTA system is extremely easy. Therefore, the installer will provide you with a fully functional and ready-to-use alarm system in a really short time!

Mobile access

The PERFECTA CONTROL application not only enables remote management of the alarm system functions. It also allows you to view at any time the current events recorded by the PERFECTA control panel and thus even more effectively watch over what is most important to you – the security and comfort of your loved ones.

- You left the house in a hurry and are not sure whether you armed the alarm? Wherever you are, you can check it and arm the system, if necessary.
- Spending your vacation abroad? The application will inform you, the security agency and other people you indicated to the installer when configuring the settings about any intrusion attempt.
- Your returns home in winter and summer can be more pleasant if the room temperature in your home is optimal. All you need to do is turn on the heating or air conditioning remotely before coming back from work or vacation.

Comprehensive protection

In addition to burglary protection, the PERFECTA alarm system provides extra security by responding to early signs of immediate fire or flood hazard. Gas detectors will protect your health and even the lives of your loved ones by detecting in time the presence of toxic gases, such as odorless carbon monoxide. In addition, detectors of narcotic gases, including chloroform vapors, will help you to avoid a burglary with sleeping gas being used by the thieves. You can sleep well!

Fire

Flood

Gas

Soporific substances

Your everyday life

SECURE WITH THE PERFECTA SYSTEM

Protecting your home from foundations to the rooftop

How to get it? Use the full spectrum of devices that detect danger inside (spatial indoor protection detectors) and outside your house (outdoor curtain detectors and active infrared barriers) as well as around it (magnetic, glass break, vibration detectors for perimeter protection). Add extra protection by installing detectors of early symptoms of fire, flooding and gas leakage. It is worth to use devices with different principle of operation, whose combined functions will contribute to creating a home secure in every respect.

A secure apartment in the urban jungle

Life in the city is fast and full of challenges. In the everyday rush, however, do not forget about what is most important – ensuring safety and security for yourself and your loved ones. Living in an apartment block, a tenement house, a skyscraper? Thinking about proper security, start with perimeter protection. On the entrance door, balcony and window, install glass break, magnetic and vibration detectors that will trigger an alarm when an intruder tries to violate your privacy. Enhance your system with indoor detectors and devices helpful in detecting early symptoms of such hazards as fire, flooding or gas leakage.

Running a small business?

Are you the owner of an intimate bistro? Running a small accounting office? Or maybe a family store, passed down from generation to generation? The PERFECTA system will ensure its security around the clock. The PERFECTA CONTROL application, using PUSH messages, will provide you with remote access to events registered by the control panel. You cannot always be there? Check remotely whether the alarm system was armed at the end of the day – if not, you can also do it using the application.

Everything under control

WHEREVER YOU ARE!

When you are away from home

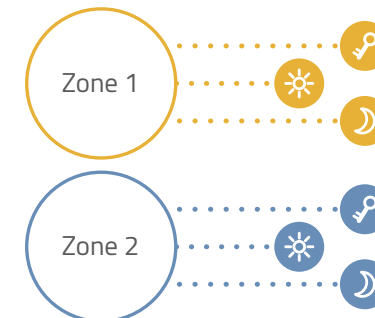

You often stay away from home? Spend most of your time at work or on business trips? Or maybe your passion is traveling? The PERFECTA alarm system will take good care of your house or apartment. You are not sure whether you have armed the system or switched off all lights before leaving? To check it remotely and also quickly change, if necessary, use the intuitive PERFECTA CONTROL mobile application.

Caring for the loved ones

Are children and the elderly or disabled persons among your household members? Now you can easily do your daily duties outside the home without worrying about their safety and security. The PERFECTA CONTROL application will keep you informed about various events, e.g. that your child has just disarmed the alarm system, so you will know that the kid has come home safely.

Security zones

Want to adjust the system operation to even better suit your needs? Divide the protection area into two separate zones. You can arm each of them independently in day, night or full mode.

This solution is for you if ...

... you own a small house or apartment, or run a small business.

...you spend your holiday in your cottage, Dutch house or a caravan, and you want the property to be secure all year round!

...what you want is a customizable alarm system tailored to your needs – it can be wired, wireless or combine the advantages of both solutions!

...you want to control your alarm system from anywhere in the world with the help of a mobile application.

Reliability

All devices included in the system undergo a multistage quality control, so they effectively protect the premises in which they are installed. Therefore, they provide you and your loved ones with the ultimate level of security every day.
